Summary

Mobile / Full-stack Developer with 2+ years of experience delivering production-ready applications. Experienced in building from scratch and owning cross-platform mobile apps and cloud-native systems. Strong in React Native, AWS, Firebase, and Supabase, with real-time features supporting 1000+ users. Focused on building scalable, reliable products in fast-moving teams.

Experience

Scheduled Inc

Nov 2025 – Present

Founding Engineer (Contract)

Remote

- Led end-to-end development of a consumer-facing React Native application, owning architecture & production releases.
- Integrated Supabase authentication and secure data handling with session persistence and encrypted storage.
- Designed local-first data models and offline-capable workflows for tasks, schedules, notes, and reminders.
- Collaborated directly with founder on product direction, technical decisions, and long-term system design.

Hipster Inc

Jul 2025 – Present

Mobile Application Developer

Remote

- Developed and maintained production-level React Native applications used by 10k+ users across Android and iOS.
- Built map-based features using Mapbox with real-time tracking, background geolocation, and AR/VR visualization
- Optimized rendering, memory usage, and background tasks to improve app stability and reduce crashes
- Contributed to a ReactJS web platform, including development of an interactive PDF/ePub reader module

Saffron AI

Aug 2024 – April 2025

Software Development Engineer Intern

Bangalore, Karnataka

- Led development of a cross-platform React Native application deployed to production with 500+ users.
- Built secure cloud-based notification systems using AWS SNS, SQS and DynamoDB.
- Automated infrastructure provisioning using AWS CDK streamlining cloud resource management.
- Designed scalable component architecture and implemented CI/CD pipelines for efficient releases.
- Integrated Firebase Authentication, Firestore DB, and AWS services including Lambda, EC2, API Gateway

Projects

NParks – Coast to Coast | *React Native, Mapbox, Android, iOS*

[PlayStore](#)

- Developed and maintained a React Native application used by 10k+ users for outdoor exploration and trail activities.
- Implemented Mapbox-based interactive maps with real-time location tracking and background geolocation
- Built GPS-based trail recording with photo capture, journaling, and media galleries for documenting user journeys.
- Contributed to performance optimization, crash reduction, and stable cross-platform releases on Android and iOS.

PaperAsh – AI Journal & Diary | *React Native (Expo), iOS, Android*

[App Store](#)

- Built a journaling app with an offline-first architecture using SQLite and background sync with Supabase.
- Implemented secure authentication with Apple Sign-In and Google Sign-In, including token storage.
- Created subscription flows using RevenueCat with entitlement gating, purchase restoration, and cross-device sync.
- Integrated AI-powered journal reflection and chat features with multi-turn context and per-journal configuration.

Education

Savitribai Phule Pune University

Nov 2021 – Jun 2025

Bachelors in Electronics And Computer Engineering

CGPA : 8.7/10

Technical Skills

Languages : TypeScript, JavaScript, C++, Python, Java

Frameworks & Libraries : React Native (Expo), React.js, Next.js, Redux

Databases : SQL, Firebase, Supabase, DynamoDB, MongoDB

Cloud & DevOps : AWS (Lambda, EC2, S3, SNS), Docker, EAS.

Tools & Platforms : Git, GitHub, Postman, Jira, VS Code, Android Studio

Achievements & Certifications

- **LinkedIn Recommendation:** Received a public recommendation from an Amazon engineer. [Profile](#)
- **Agile Project Management Professional Certificate (Atlassian):** [Credential](#)
